

PARENT-TEACHER SEMINAR SERIES: **UNDERSTANDING** **TESTING**

WHEN

TUESDAY, OCTOBER 27, 2015
7:00-8:30 pm

WHERE

St. John the Baptist School - Room C1
5375 Dry Ridge Rd., Cincinnati, OH 45252

What on earth are PNP and GE and all of the other abbreviations on a student's standardized test score report?

What possible reason would there be for a 7th grader to take the SAT?

Understanding your child's scores from the CogAT, DIBELS, Star, Iowas, MAP, HSPT and other standardized tests can be like reading tea leaves!

In this session, parents and educators will make sense of the alphabet soup and all of the numbers from ability, achievement and IQ tests.

Discover how test results can provide insights into a child's learning profile so you can understand the child's strengths, recognizing areas of gifted identification and potential for growth. Consider test ceilings and workarounds for them. Become fluent in the testing language!

All parents and educators from Greater Cincinnati are welcome to join this seminar.

Anne Flick is a Gifted Instructional Specialist who has presented at state and national conferences and provided workshops for teachers in multiple districts.

In addition to presenting on testing and its relationship to gifted education, Anne will facilitate a discussion among attendees where they can ask questions and share successes.

Parents are encouraged to bring their child's test score report to review privately as information is presented.

Certificates of attendance can be provided for educators to submit to their LPDC.
